Dear Sir/Madam,

Disclosures pursuant to the Listing Agreement

Pursuant to our obligations under the Listing Agreement, we wish to inform you that PL Engineering Limited, a Punj Lloyd Group Company has today entered into a partnering agreement with Nuvia India Pvt. Ltd, part of Nuvia, a French major providing engineering and technical support for the nuclear power sector.

The partnering agreement will lead to the creation of a new joint venture company to deliver quality nuclear engineering and operational support services to the global market. The Joint Venture will focus initially on providing services to the growing Indian Nuclear sector and will later look at the global market.

A copy of the press release being issued in this regard is enclosed herewith for your information and records.

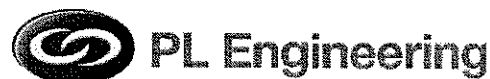

Thanking you,
Yours faithfully

for PUNJ LLOYD LTD.

Press Release

Nuvia India enters into partnering agreement with PL Engineering, a Punj Lloyd Group Company

- JV to offer Nuclear Engineering and Support Services

New Delhi, September 29, 2010: Nuvia India Pvt. Ltd., part of Nuvia, a French major providing engineering and technical support for the nuclear power sector, today entered into a partnering agreement with PL Engineering Limited to offer nuclear engineering and support services. PL Engineering is a Punj Lloyd Group Company that provides a full spectrum of design and engineering services in plant, product, infrastructure and nuclear sectors.

The partnering agreement will lead to the creation of a new joint venture company to deliver quality nuclear engineering and operational support services to the global market. The JV will focus initially on providing services to the growing Indian Nuclear sector and will later look at the global market.

Speaking on the agreement, Jérôme Stubler, Chairman, Nuvia Group said, "We have over five decades of experience in supporting nuclear power plants and their infrastructure globally. We intend to play our part in India's nuclear expansion programme and are delighted to have entered into a partnership with the Punj Lloyd Group to leverage the existing opportunities in the Indian nuclear sector. This is an important milestone in the developments we have planned for Nuvia India."

Given the emphasis on accelerating the civil nuclear power program in India and the political encouragement on international collaboration, Nuvia has committed itself to establish a significant base in India in collaboration with the Punj Lloyd Group to offer its engineering and technical support services and range of specialist products to the global nuclear market.

Speaking on the agreement, Atul Punj, Chairman, Punj Lloyd Group said, "We are extremely pleased to partner Nuvia and further strengthen the existing bilateral relations between France and India. This alliance will open new opportunities and ensure a rapid entry into a market that demands high levels of quality and attention to detail, which we are very familiar with in our present areas of operation."

PL Engineering has made a strategic decision to enter the nuclear supply chain following the acceleration of the Indian nuclear programme with the introduction of new international reactor vendors. The skill sets and experience in working in highly regulated market sectors such as oil and gas are readily transferable to the emerging nuclear sector.

This JV will bring the Indian know how and resources together with global nuclear skills and experience which will introduce a new dimension to the supply chain. This in turn will address the complex resource demands of the planned nuclear new build and refurbishment programmes.

Note to Editors

About Nuvia

Nuvia can trace its roots from the beginning of the world's Civil nuclear programme. It offers its independent support services to governments, regulators, power plant operators, and turnkey contractors. Pioneering work in construction, engineering, nuclear R&D, design, build, operations, radiation protection and decommissioning has been undertaken; always with a strong emphasis on safety, quality, and sustainability. The Group's rich heritage is reflected in the wide range of services provided today. Nuvia is a Nuclear specialist company with over 1500 staff and pride ourselves on being an independent supplier of advice, engineering resource and specialist products. These products and services have been provided to many of the world's nuclear power plant and their associated infrastructures, giving Nuvia a global perspective of the demands of the Nuclear Industry and a trusted partner. Nuvia is the nuclear arm of the VINCI group, and a subsidiary of its specialised work and engineering company Soletanche Freyssinet with 16,500 staff and a turnover of 2,4B€. Soletanche Freyssinet is a wholly owned subsidiary of VINCI, the world's largest integrated concessions and construction group. Nuvia's parentage provides a solid foundation and offers its clients unprecedented access to a range of outstanding engineering expertise.

Nuvia has now incorporated a subsidiary in India. Nuvia India Pvt Ltd is based in New Delhi and will have regional offices in Mumbai and Chennai.
