

# A Fine Balancing Act

WE BELIEVE IN TAKING ONLY AS MUCH FROM  
THE ENVIRONMENT, AS WE CAN GIVE BACK.

Living by the credo of sustainable development, we have ensured that our operational strategies focus on minimising pollution, optimising fuel consumption, converting waste into resources, and preserving the environment. We take pride in having reinstated the Zamanti river in Turkey, practising innovative waste management techniques along the BTC pipeline, conserving the flora and fauna of the area adjoining our project site in Indonesia's Mahakam River Delta and winning the Gold Award for Environmental Performance in the engineering sector at the 8th Annual Greentech Conference 2007.
