A Responsible Corporate Citizen

The Group's commitment to society is firmly rooted in its endeavour to respect life and effort to operate in a socially responsible and ethical manner. The key Initiatives undertaken for education and community development in India are as follows:

- Punj Lloyd holds its head high when it comes to doing its country proud. Besides creating infrastructure across the length and breadth of India and globally, Punj Lloyd has pioneered many initiatives for a better and enriched living, under the aegis of Pt. Kanahya Lal Dayawanti Punj Foudation. One such growth story is that of Sitamarhi in Sant Ravidas Nagar, Bhadohi district of Uttar Pradesh, India, where Punj Lloyd has almost exclusively adopted three villages Baripur, Narepar and Bankat. Efforts made in the field of social development can be clearly gauged by the holistic development of the district.
- Punj Lloyd is committed to protecting the environment through minimizing pollution, optimizing fuel consumption and converting wastes into resources
- As the first corporate to fund the Indo-US HIV/AIDS Initiative, Punj Lloyd launched 'Life Enrichment' for construction workers – a holistic welfare programme at its project, Medicity - a multi-specialty medical institute in Gurgaon, India. The programme addressed key issues related to HIV/AIDS, and other diseases among the staff and worker community at the construction site. The impact of the programme saw a decrease in safety incidents at site, absenteeism, increase in worker morale and productivity. The Group is now institutionalizing the programme at other sites.
